

CRYPTO TAXI

PLAY AND EARN
NOT JUST A TAXI

CRYPTO TAXI

Crypto taxi is a decentralized financial tool game on **Binance Smart Chain** network, which allows both passive and active investors to make money.

In order to make a profit, users need to buy a **driver license (registered)** before they can start rent different districts and have first rides.

GAME RULES

- Only when all previous districts are opened can certain district be constructed;
- The cost of obtaining the driver license (registration) is 0.025 BNB (*10\$);
- The higher the district, the higher the cost;
- The rented district allows you 3 days, each time accounting for 74% of its cost, after which the rent period will finish and need to renew the rent;
- Users can renew the rent in advance without waiting for the Lease to end

AFFILIATE PROGRAM

10 LINES = 24%

Affiliate reward comes only from active districts. If your district is not active, then the reward will be credited to the first player above you with an active district

UNDER THE HOOD →

SYSTEM SAFETY

The Crypto Taxi game is made in the form of smart contract in BSC network. Funds will not be stored in the smart contract, and all inflow funds will be distributed to users immediately according to the rules of the game.

The interface to interact with the smart contract is the website, but it also eliminates the problem of DDoS attack, because the role of "data server" is performed by the smart chain, and the static files are distributed on the CDN network

OPENNESS PRINCIPLE

All smart contract codes will be verified and available to users for free. Any player who wants to make sure the code is consistent with the rules of the game can do it himself
